### Spook Literature.

Among the many strange and curious of a better name, spook literature. Book after book is being issued, until in volume Prof. Elliot's five-foot shelf. Almost everyone has heard or read

The names of these gentlemen, the one because of his emiince in science, and the other in literature, give force and authenticity to he results of their psychic researches these gentlemen to spook literature has een noteworthy, but it is comparatively a very small part of the whole. Others have been contributing-ordinary people who can not depend on their personal noteworthiness to emphasize their deliverances.

There has always been, since the world began, a consuming yearning to gone before, and those who deny a what we call death, are in the habit of pointing triumphantly to the fact that of the billions of people who died. he has found in the new life, or how he fares on the new plane; and no from any departed spirit to enlighten the banks of the Nile, in the pre those who are left behind. Spook literature is now professing

to supply this deficiency. A doctor who had been a soldier in the Civil war, and who for many years was a successful physician, grew old and decrepit and died in 1914. He, or his spirit, was called to the battlefields of France, where his services were needed, and he responded promptly. He communicate with two women who had en under his guardianship during his and they wrote down what he told them from time to time, and these messages were put together in a small in the writing. He illuminated their minds so that they could see and understand his thoughts and the information he wished to convey. The women were sure of his identity, and while the reader may have his own notions or prejudices on the subject, the testimony of these two ladies is as good boots will have, mere human testimony can be. There are those who maintain that there was no spirit communicating that the women were communicating with their own subconscious souls or minds, which know all things. This excesses accesses accesses is merely opinion, and the reader can make his own choice. Quien sabe? A boy gets in communication with his state of the state of To The News Scimitar:

George V. Fulton's letter, which appeared in your paper, gives your readers as the cause of the defeat of Veniselos his hostility to King Constantine. Nothing could be more wrongly stated. Of course, I don't expect Mr. Fulton to change his ideas because I say he is wrong, but I am sorry to see that my friend from Mississippi still preserves his royalistic ideas.

Venizelos was defeated because the people wanted a change. The whole world is restless and people change governments as the only means to bring order out of the present chaos.

Why were Clemenceau, Orlando and Wilson defeated? Just because their leople want change. These three great men didn't use martial law to win the mother, and his messages, published in book form, are such as an intelligent boy would write. To the querulous objections of doubters this good woman what subconscious mind is, and in this respect she is like most other people. It took Buddha six years of solitary communion while seated under the Bo subconscious mind, and learn that he had fived 153 lives or incarnations on

lions of followers and devout believers at the present day.

What it all is no one can tell, of course, butsthis flood of messages purporting to come from the spirits of depurted human beings is most interesting. This is not entirely accurate; for while these spooks are what we call dead, they, with singular unanimity, claim to be as much alive as they ever were, and that they are working and striving and carrying on and learning while preparing for advancement to another plane higher up or farther on.

Once the reader gets over the feeling that all such matter is uncanny, and that it is sinful to seek information from hose over whom the grave has at the pro-king. The clemenceau, Orlando and Wilson defeated? Just because their neeple want change. These three great men defeated? Just because their depole want change. These three great men defeated? that all such matter is uncanny, and that it is sinful to seek information from those over whom the grave has closed forever, the messages can be read much as any other literature is read. At times they remind one of theosophical and Christian Science writings. Those not of the illumination alives that there is in these writings are something beyond them. Unimpeachable in orthography, etymology, syntax and prosody, they at times elude a firm musicular grasp upon them. Something similar might be expected if one were to hear an oration delivered by Pericles or Demosthenes. He might enjoy the clear enunciation, the beautiful cadences, the gestures and the fiery spirit, but the message would have he meaning to him because he did not understand the tanguage. Spook literature is written in simple and correct English, any part of it is easily understood by the clear who has opinion Ring Constantine was a much pro-German as the kaiser himself told me that in his opinion Ring Constantine was a much pro-German as the kaiser himself. as much pro-German as the kaiser hi stood, but as whole it is unapprehendible. Perhaps the science of spirit communication is in its infancy, and All insist that it is not necessary to have recourse to what is called a medlum, and that unyone can communicate unless that spirit is passed entirely beyond the reach of earthly ties, as all do in the crurse of established progres-

ture and who claim that while spirits may communicate with human beings. they are evil spirits, it may be observed that Paul did not think so and Paul ought to be as good authority as any

Spook literature is one of the most curious phenomena of the twentieth century, and while it may have its defects, it is a physical fact that can not be ignored by the intelligent, nor argued

away by the prejudiced. No matter how we dispose of it, the heart hunger see beyond the vell, and learn something of loved ones who have "gone west," as the soldier boys call death, will remain as it has always existed to trouble the spirits of the sorrowing

The most expensive item in the family food bill is the meat. Meat is also the item which requires most knowledge and judgment when one goes to market. Low-priced meat may be a wasteful buy. Half of it may be bone and gristle. Meat at twice the price may be cheaper.

The department of agriculture has made a bulletin that tells the housewife how to select her meat, what the different cuts are, what is the food value of each.

It also tells her how to cook her meats, how to preserve the flavor, how to get full value out of the last piece of bone, the last spoonful of extract.
